06-MusicGeneration

Nick Montoya
Yifan Li

Vision:

Allow users to create, find, and auto-generated playlists based on factors of their choice

Project description:

➔ We allow user to log into their Spotify account.

➔ Users are able to search for a song and modify their personal Spotify playlists.

➔ User can also get an auto-generated song list based on either songs genre, year or artists

Brif Demo:

https://www.screencast.com/t/BhVj29va

Use-cases:

Use-case 1:
Generated playlist base on Year, Genre and artists

Use-case 2:
Add auto-generated playlists to user's account
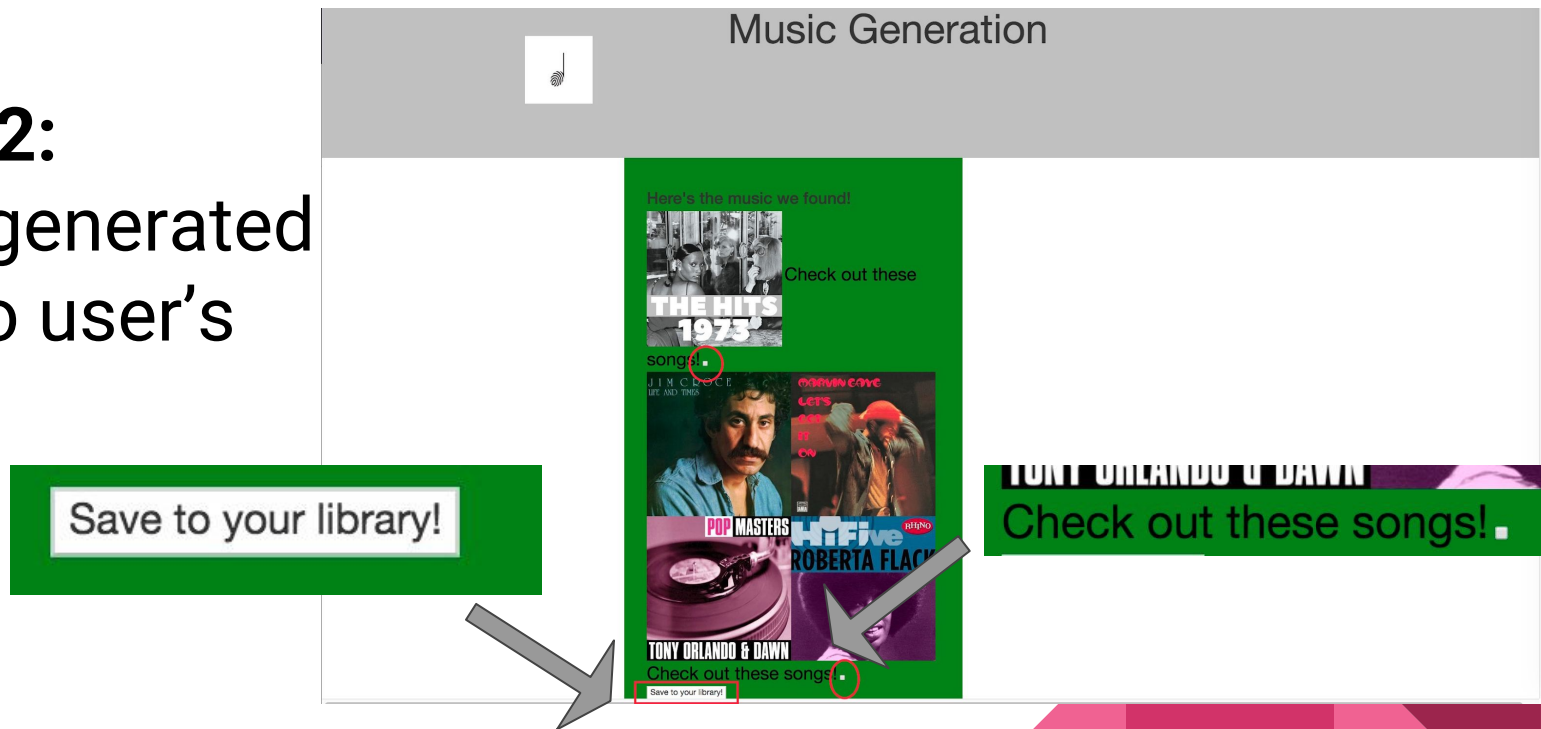

Design Pattern: Composite Pattern
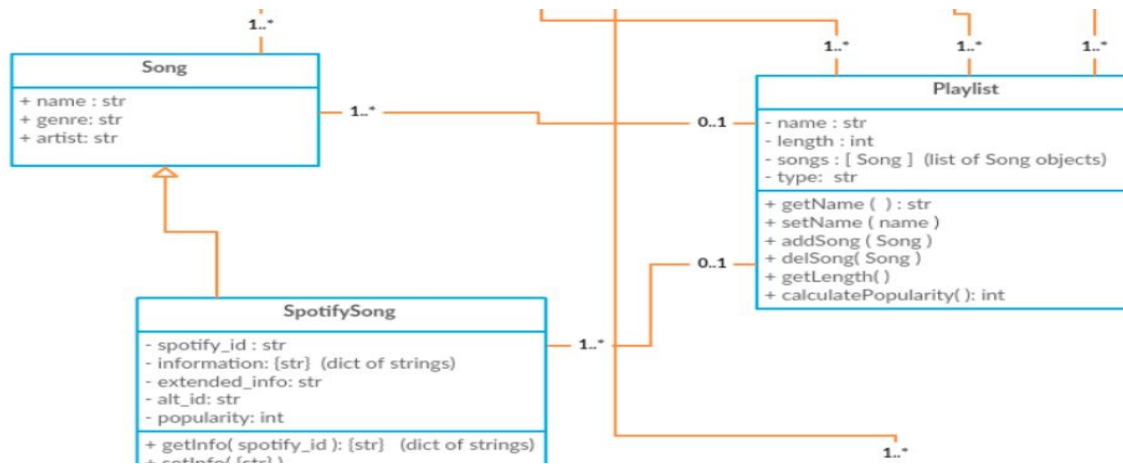

Why do we choose composite pattern?

Thanks for listening
